SAFETY & SECURITY

A SAFE ENVIRONMENT

Park Place was designed to minimize the chance of a life-threatening emergency and to reduce damage in the event that one does occur. The building is inspected periodically and monitored 24 hours a day, 7 days a week. Safety systems meet or exceed all relevant fire and building codes.

Smoke detectors and overhead sprinkler systems provide an immediate response to any significant fire. An automated alarm is initiated whenever water flows through the overhead sprinklers. Manual pull stations located in each hallway near the exit stairs and smoke detectors in strategic locations also initiate alarms, alerting the Lobby Security Console and the Fire Control Centre. Whenever an alarm is received, the Fire Department is automatically notified.

The Fire Control Centre has direct communications with each floor, stairwell and elevator. A network of speakers can be used to give verbal instruction or information should the need arise. There is also a telephone system located within the refuge areas on each floor. Key building management personnel carry 2-way radios during normal building hours and the building operations staff is trained to assist in any emergency.

Due to the fire resistant qualities of modern office high-rises, total evacuation of the building is very rare. **Evacuation** is usually necessary only from the fire floor, the two floors directly above the fire floor and the two floors directly below. Additional floors may be evacuated when ordered by the Fire Safety Director, Fire Department or Police.

SAFETY IS EVERYONE'S CONCERN

Primary responsibility for the safety of building occupants and compliance with fire codes rests with each tenant. Material in this guide is supplied as general information to help you meet requirements. It is not Management's intent to direct the tenant to adopt or use part or all of the given information, nor does Management or Ownership assume any liability in connection with all or part of the information that may be used or adopted by the tenant.

Should evacuation become necessary, the authority and responsibility rests with the local officials of government. Neither Management nor Ownership can assume responsibility for any consequences resulting from the decision to evacuate or not to evacuate.

IN CASE OF A MEDICAL EMERGENCY

1. Do not move the person. If necessary and you have been trained, administer first aid.
2. **Dial 911.** Call for an Ambulance and Paramedics.
Tell them your address, floor and suite number and direct the medical team to the front door. You may be asked to describe the condition of the victim.
3. **604-682-1954.** Call the Security Desk. They will hold an elevator ready for the emergency medical team.
4. Post one person at the elevator lobby on your floor to lead the medical team to the person in distress.
5. While awaiting medical help, keep the person warm and comfortable.

EMERGENCY PREPAREDNESS – TENANT RESPONSIBILITIES

Under the guidelines of the Vancouver Fire Department, tenants of high-rise office buildings must participate in emergency response plans and make responsible and dependable employees available for designation as Floor Wardens, Alternates, Group Leaders, Monitors and Aides to the Handicapped or Disabled. An organization chart listing the names, locations, and telephone numbers of the designated employees is to be kept current and supplied to the Property Manager.

Tenant designated floor wardens are required to participate in the annual fire safety seminars and fire drills. All employees must be instructed that fire drills are not to be taken lightly and to cooperate with the instructions of Wardens assigned to their areas.

Employees should be instructed to report all smoke or unusual odors indicating a possible fire to their Floor Warden. All fires, no matter how small or quickly extinguished, must be reported.

Primary responsibilities for the safety of employees rest with each tenant. It may be necessary to adapt the plan outlined below to suit your space and number of employees.

FIRE DRILLS

All occupants of the building are required to participate in fire drills. Drills are conducted at least once a year. A written record of fire drills is maintained in the Fire Safety Plan.

Fire drills will be announced via the Emergency Notification System. The announcement will consist of a statement by the Fire Safety Director. The Floor Warden in charge will usually be informed of the drill a few days in advance. All occupants on the drill floor are requested to participate.

Upon hearing the signal, Floor Wardens will alert their area occupants that a fire drill is in progress and advise them to proceed to their assigned exit stairwell and begin exiting the building.

The Tenant must designate two *Search Monitors*, male and female; they will have the responsibility for inspecting areas of the office and lobby space for people who may need extra help following evacuation procedures.

Once alerted to a fire emergency, Searchers will inspect restrooms, conference rooms, boardrooms, lunchrooms and other isolated areas to assure that everyone has heard, understands and responds to the signal. They should make special note of persons with hearing or sight impairments in their areas, and assure that they have been relocated. Once their areas are clear, Searchers report to their Floor Wardens and handle any further requested assignments.

The Fire Safety Director will observe the exercise and point out deficiencies. The drill will be over when the Fire Safety Director makes the announcement ending the drill.

FLOOR WARDENS

Floor Wardens play a major role in the event of an emergency. People who volunteer for this position should be in the office at most times during business hours and have a degree of authority, judgment and some familiarity with hazards found in emergencies. Two Floor Wardens must be designated for full floor tenants and one Floor Warden from all other tenants at Park Place. *Floor Wardens can be identified wearing an orange mesh vest during emergency situations.*

The appointed or designated floor warden is to be given full authority of the space or area he/she occupies upon a required evacuation of the premises. This person(s) and role is to be understood and communicated to all staff or employees who occupy the space or area the floor warden is responsible for. In most instances we highly recommend an alternate or deputy floor warden be appointed as well as assistant monitors if required (to assist any persons with special considerations).

The floor warden manual will be provided to you and will assist to communicate and orientate all employees to the emergency procedures and life safety systems on the floor they occupy.

In addition to the manual provided, floor wardens will be asked to attend mandatory annual emergency response training seminars provided by WPS Disaster Management Solutions Ltd. and the QuadReal management office. These training seminars include detailed information on various potential threats that are not covered in the manual. *Please bring the Tenant Floor Warden Manual to the training class.*
